This image displays a collection of overlapping educational worksheets for sight word recognition. Each worksheet is designed for a specific word and includes various interactive activities:

- Tracing:** The word is written in a large font for tracing.
- Connect It:** Letters are scattered in boxes or hexagons, and students connect them to form the word.
- Find It:** A grid of letters where students search for the letters of the word.
- Circle It:** The word is written multiple times, and students circle a specific letter.
- Build It:** A series of boxes for students to write the word letter by letter.
- Color It:** A small illustration related to the word (e.g., a green leaf for 'green', a cold for 'cold') to be colored.
- Scissors and Glue:** A dashed line indicates where to cut, and a glue bottle icon indicates where to paste the word.

Visible words include: many, green, sit, does, done, cold, call, pull, first, don't, would, and many others. Each worksheet also features a 'Name' field and a small cartoon character.
