Roll again

### Instructions for Match My Colors

Color words are usually taught as beginning sight words since they are important for young readers to identify when they're reading. The fun game helps students learn to recognize the spelling of all the major colors.

- Choose the color you want to use for the game. The game can be played with either of the two color schemes. The numbers refer to the pink, gray, white, black, and brown colors.
- Use each student's "Match My Colors" mat. They can be given copies of the same mat or different mats. Change out different mats for each color scheme.
- Choose one of the two dice to use for the game.
 

Dice 1		Dice 2	
1	2	1	2
3	4	3	4
5	6	5	6
- Each student has 2 different mats (labeled 1, 2, and 3). Each student uses to spin the same mat, or they may be given different mats in the same color scheme (as many as you'd like).
- If using one mat, 1 student's color is ALL the colors on that mat for the number rolled. If using multiple 2 students color only the number of squares for the number rolled. On versions 1 and 2, each mat will require the student to "roll again" instead of coloring any squares.

Ways to Play:

- Students all have the same mat. Take turns rolling the die, and only the student rolling the die colors in the color rolled.
- Students have different mats. Take turns rolling the die, and each student colors in the color rolled on their mat.
- Students have the same or different mats. Students roll the die, and each student colors in the color rolled on their mat. Some mats are different. They will be colored in at different rates.
- Students have the same or different mats. Each student rolls the die, and each student colors in the color rolled on their mat.
